**WEB DEVELOPMENT – ACTIVITY-BASED LEARNING (ABL)**

**1. Student Details**

- **Name:** Deepthi Jayavarapu
- **Roll Number:** 80
- **Branch:** CSM
- **Section:** CSM-04
- **College:** NRI University

**2. Programs Selected**

1. **Sweet Treats Bakery Website** – A website designed to display bakery products in an attractive layout.
2. **Online Learning Platform** – A website designed to present educational content and learning resources.
3. **Travel Explorer Website** – A website designed to showcase travel destinations with images and descriptions.

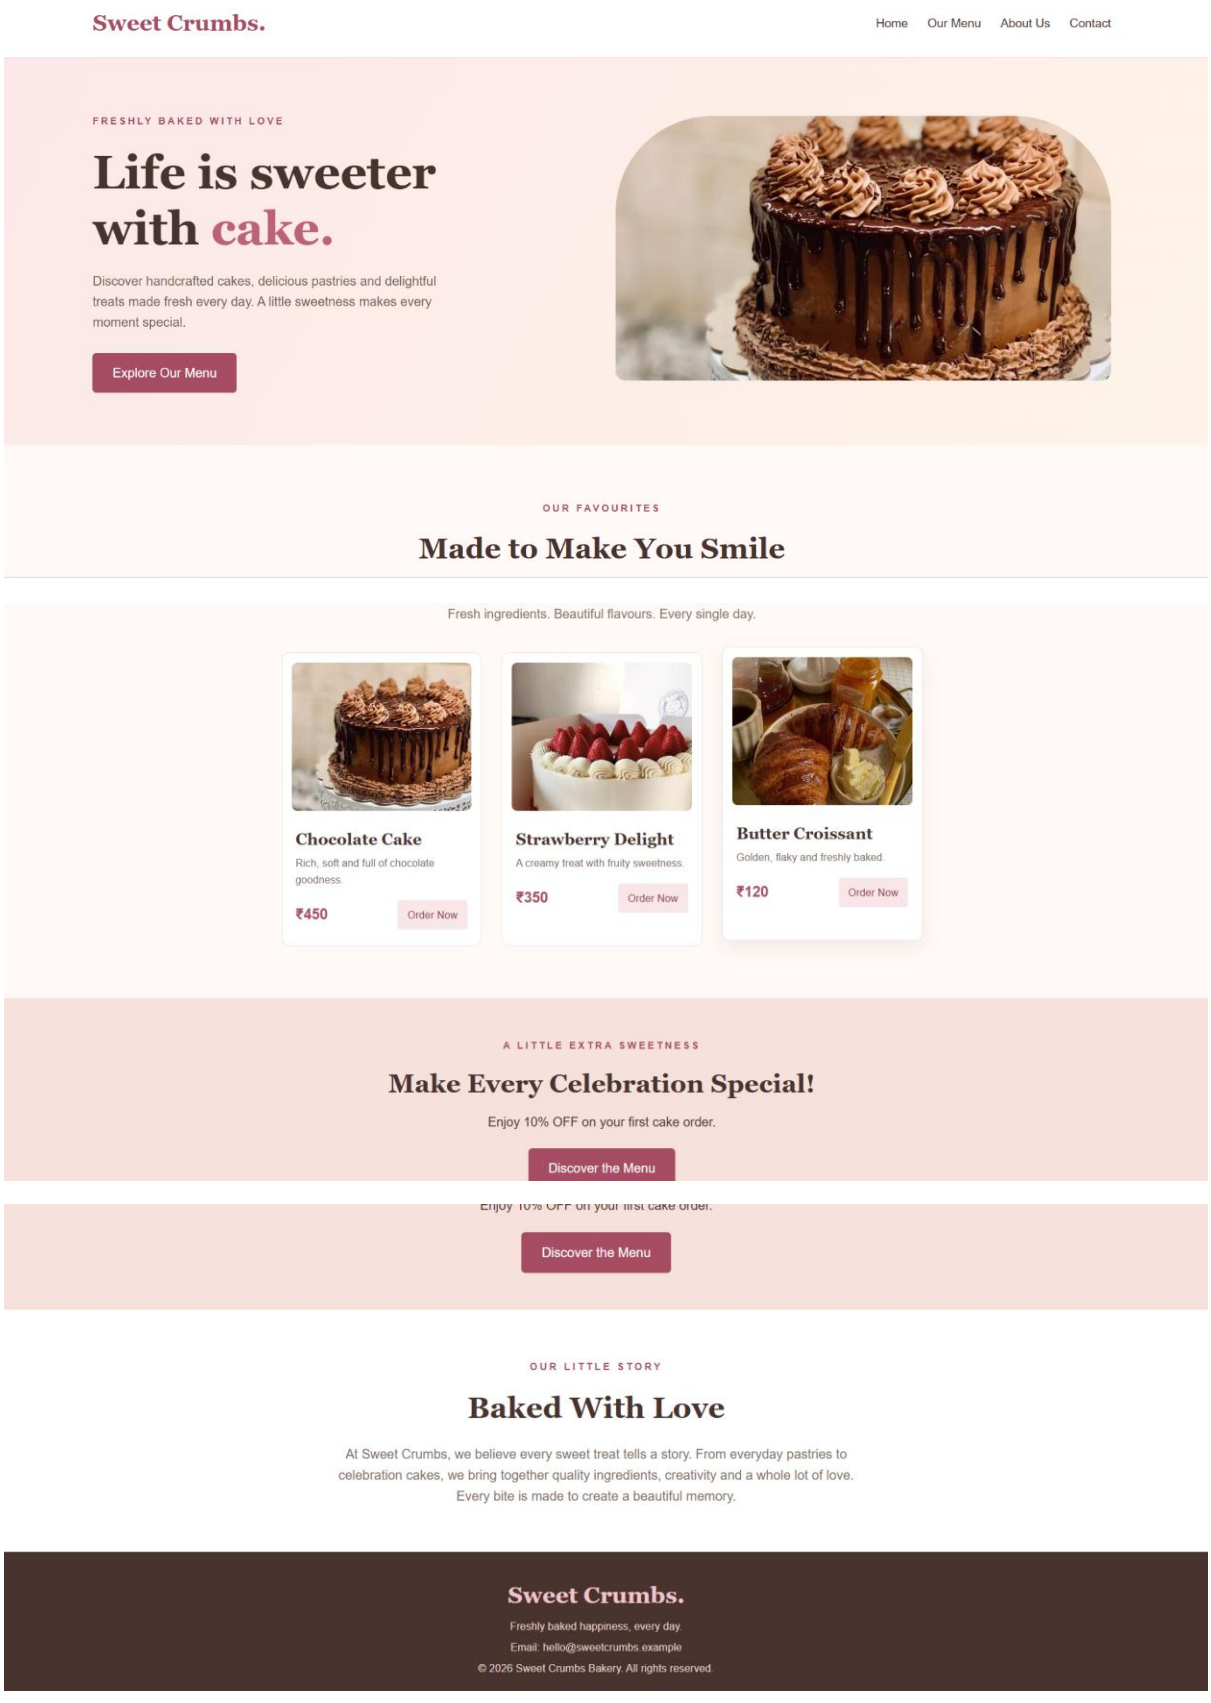

**3. Technologies Used**

- **HTML5:** Used to create the structure and content of webpages.
- **CSS3:** Used to style webpages with colors, fonts, backgrounds, and layouts.

**4. Introduction**

The main objective of this Activity-Based Learning assignment is to gain practical knowledge of web development using HTML and CSS. Through these three websites, I learned how to create webpages, add images, organize content, and apply different styling techniques. This activity helped me improve my creativity and practical web development skills.

01. **Sweet Treats Bakery Website** – A website designed to display bakery products in an attractive layout.

02. **Online Learning Platform** – A website designed to present educational content and learning resources.

**CONCLUSION:**

This Web Development ABL activity helped me gain practical knowledge of HTML5 and CSS3. By developing the Sweet Treats Bakery, Online Learning Platform, and Travel Explorer websites, I learned how to create webpages, add images, and apply different styling techniques. This project improved my creativity, coding skills, and understanding of web development.
